## DETAILED ACTION

### *Election/Restrictions*

1. Claims 2, 3, 5-10 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected heat treatment apparatus, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on June 2, 2005.
2. Claim 1 is generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 2, 3, 5 and 6, directed to the species of a plasma display panel manufacturing method no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.
3. This application is in condition for allowance except for the presence of claims 7 to 10 non-elected without traverse. Accordingly, claims 7 to 10 have been cancelled.

### *Priority*

4. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

*Specification*

5. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: Method of Manufacturing a Plasma Display Panel by Decomposing Impurities in Exhaust Gas with a Catalyst.

*Allowable Subject Matter*

6. Claims 1-6 are allowed.
7. The following is an examiner's statement of reasons for allowance:

Regarding to independent claim 1, prior art of record taken alone or in combination fails to teach or suggest a plasma display panel manufacturing method comprising: decomposing impurities included in exhaust gas generated in the heat treatment by action of a catalyst in combination with other claimed features of the present claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

*Conclusion*

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The following art are cited to further show the state of the art of method of manufacturing a plasma display panel.

U.S. Patent Application No. 2005/011810 to Harada.

9. This application is in condition for allowance except for the following formal matters:

The title of the invention is not descriptive.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
